IN 1903 a red-lettered pamphlet written in Chinese calamity for the years 1906 or 1907, in which 80-90 per cent of the population would die.

On September 18, 1906 a typhoon hit the Colony and nearly 9,000 junk people met a violent death. Another 1,000-odd people throughout the Colony were also killed.

Fortunately the oracle who made the prediction in the pamphlet was inaccurate:

But when it was over it was remarked how philosophically the Chinese had taken their misfortunes. There was no sign of weeping or wailing. One and all seemed to have left their sorrows behind in order to be of material assistance both to themselves and others.

But the Chinese were not the only people affected by this typhoon, for the Protestant community of Hongkong lost their leader, His Lordship the Bishop of Victoria, Bishop Hoare, who was lost at sea, while on his way to the New Territories. But what of this red pamph-

But to break away from conjecture and look at the other side of the story. In their reports, the South China Morning Post rather belittled the Observatory, whose forecast for September 18, the day the typhoon struck, read: "variable winds moderate with some thundery showers."

In fact they stirred up quite a hornet's nest. Their correspondence columns for the next three weeks are dotted with attacks against the Observatory of a typhoon, and still more letters from the Observatory

PACK from the Long Vacation we members of Parliament have gathered at Westminster merely to dissolve ourselves. "It is like the Bawl at Brussels on the eve of Waterloo," wrote sardonic reporter in the Gallery. The General Election is on and the power passes from us to the people.

In a few minutes we shall hear the words that spell the dissolution. The electric bells will ring all over the Palace of Westminster to indicate that the House is up but there will be one difference. The stentorian-voiced policeman in the Lobby will not shout: "Who goes home?" as is the custom each night when the House rises.

But why this silence on the officer's part? Why this refusal to grant us police protection in case an angry mob is waiting outside? answer is simple. From the moment that Parliament is dissolved we cease to be members of Parliament. Instead we revert to the lowly status of an adopted candidate and no more.

For those of us who have been, at Westminster for a long time there are little tragedies and sorrows which are inseparable from the passing of a Parlia-ment. This time there is the loud-voiced good-looking policeman who stands guard over our cars in Palace Yard and presses the bell which informs the taxis in the swirling traffic that a member of Parliament is ready to do a deal in the matter of mbtor transport.

But the cheery policeman's voice was strangely subdited, and there was no smile on his face as we wished him good-bye, He had reached the age of retirement and was parting with six hundred friends whom had served at all hours in the matter of transport.

A Friend

In the Members' Dining Room too, there was a pretty waitress antly to power as a man who had critics but no enemies. who is no longer young, but her humour and her personal knowledge of every M.P.'s oddities in the matter of food and drink made her our counsellor and friend. VERONICA PAPWORTH

Presenting an autumn preview... what the latest trends from Rome. Paris and New York will mean to the women who set the fashion pace in Britain ...

Now the GREYHOUND GIRL

THE fashionable female look for next season is now settled. The size, shape, and character of the bit of cheese in the Tender Trap is established. With the first faint sniff of an autumn breeze, the Greyhound Girl will be with us.

From Italy, where they are just catching on to the IN and OUT game, it is reported that cat girls, tiger girls, and gazelle girls are OUT.
"Greyhound girls" are coming in—FAST.

From New York via Kenneth Batelle-boss of the top flight Lilly Dache hairdressing salon and a man who numbers Marilyn Monroe and Mrs William Paley among his clients—there is news of a longer, sleeker

look about our hair. Visiting London Mr Batelle assured us - "the latest hair colour is beige."

From the Institut de Beaute in Paris a style of make-up called "maquillage gouache" (painting with opaque colours, according to my dictionary) is reported ... from Dorothy Grey in London we have a whitening cream "for a porceluin finish" and from practically every cosmetician in town there is a "whitening stick" to paint pale, translucent cyclica.

More supple

Already noted is the "long," supple" look in clothes

So the picture builds up - pale skinned, beige-haired, white-lidded and elongated.

Greyhound fanciers may be forgiven if they see in this a pen portrait of the 8.30 winner at the White City!

I have been talking to John Frencha man whose working days are spent entirely in the future. Currently, kneedoep in artificial snow, he is (photographically) celebrating Christmas.

He knows all about the "look."

"It's an extension of the Kay Kendall manner," he said. 'Light. fine-boned and desperately nervous looking. More of a whippet than a greyhound perhaps.

WHICH COLOUR

PULLS don't like red. Flies dislike blue. Bees have an aversion to black.

Which of these three statements is true Answer, the last two.

It is a popular fallacy that bulls hate the sight of red — they are colour-blind. But flies do dislike blue, and bees don't like black a bit — although they are very responsive to white and brighter colours

How about human beings? If In olden days it was consider-colours can affect flies and bees, ed a protection against plague how much more can they affect or illness; today we know it has human beings! Colour Is Important

When a ray of light is split up, it becomes a spectrum of rainbow colours. We are surrounded by light and ce" ur: we cannot escape I am. Whether we are planning interior decorating or busing a now dress-colour is important, Let's take the five main colours-green, red, purple, blue and yellow, Between these there are, of course, innumerable other shades, from pastels to the very dark hues. If you're wise you'll consider colour and its part in your life . . . and just see what it can do.

Green, the colour of meadows, hills, hedgerows and trees, is Nature's colour, The superstitious believe it is unlucky to wear green. If you are superstitious, the only cure is to wear it for one day-and see.

Nothing, probably will upset your day, and you will find that you're wearing green more and more. Like Nature, green is soothing.

Danger And Excitement

Red is a strong, rich, fullblooded colour. It carries suggestion of danger and excitement; and it is striking. Be careful of red-but don't avoid it. Try small splashes of it when you need cheering ... porhaps a bright red, lipstick matching a gay scarf for example.

Purple is fittingly synonymous with royalty. It is a deep, mysterious colour, and best kept for the woman with the grace of age, and the beauty of white hair. In its lighter shades -mauve, lilac-the colour can

be worn by the young, Blue promotes a harmony of body and mind. It makes women feel at ease, relaxedand so do those whom she meets. It is a cool colour, the colour of sea and sky, and it soothes.
Yellow reflects more light
than any other colour. Yellow and sunshine go hand in hand.

Handsome Mr Greene laments the plight handsome actors

PICHARD GREFNE has just begun his first major film in four years, so I drove down to the studios to find out how he was surviving.

During those four years away he has made nothing but money and Robin Hood television films, and I suspected that he might be missing all those bows and arrows parked about the place. To say nothing of the comforting crackle of folding money.

"Well," he said, sitting me down in a chair in the sunshine. "Of course I do miss the series. Four years is a long time. And I'd happily have gone on for another year. But I had to come back to films

"Now that you're back," I said (he's co-starring with Eva Bariok in Beyond the Curtain) "would you ever do a TV

series again?" "I've had plenty of offers," he said. "But nothing as good as Robin. Of course, when I first took that a lot of my friends sneered a little. They took the view that I must be on the skids. Then when I began making money and bought an expensive sports car and a racing yacht they began to change their minds.

THE OLD TAG

Since his divorce from actress Pat Medina some years ago Greene-an energetic 41-year-old-has paid more attention to yachts than to women.

Passion never reared its primitive head in the confines of Sherwood Forest-and now that he finds himself called upon to participate in some particularly passionate love-scenes with Miss Bartok, Mr Greene is rather taken aback.

"That glamour-boy, screen-lover tag is so far behind now," he said, "that I don't want it brought up again.

"Sometimes I come across pictures of myself taken when I first went to Hollywood. They are almost too much to take. I look such a jerk.

"But then, of course, good looks and slick suiting were standard equipment in Hollywood before the war, so one must make allowances.

PROBLEM

"Are good looks a drawback for an actor

'In many ways—yes," said Greene. "If you're good looking nobody believes you can act. Look at Tony Curtis: look at the battle he had to prove he wasn't just a pin-up boy.

"What about the man who was the idol when you first went to Hollywood-Robert Taylor? Do you still consider him good looking?"

"Not any more," said Greens, "As a matter of fact I saw bits of a new film of his not long ago and I was surprised to see how haggard he looked. Somehow he seems to have matured less attractively. say, than Tyrone Power did."

SECURITY

I asked him finally how it felt to be back filming again after so long, "It's good," he said. "Especially when you get a film as exciting as this one.

But I loved Robin Hood, as I've said. It changed my life; it gave! me security. I'm a much more the front door playing "I'll See Hollywood. Now she has just contented man than ever before. Should the Press be excluded from all official meetings of the Hongkong Football Association?

That may seem a strange question to raise at this time but it is a subject which is allegedly being given a lot of thought in many places at present.

There is apparently an ever growing school of thought that all meetings of the HKFA should be held in private and that an official press release should be issued after the business of the meeting has been concluded.

Ruling Against Du Pont **Empire**

Chicago, Oct. 2. A Foderal judge ruled today that the Du Pont industrial ampire can no longer vote its 63 million shares of stock in General Motors. Federal Judge Walter J. La Buy also ruled that Du Pont and two associated holding companies should be barred from acquiring any additional holdings in General Motors and from trying to influence the policies of the big car company. La Buy acted following a U.S.

Supreme Court ruling that Du Pont's 23 per cent holdings in General Motors constituted a tendency toward monopoly. The judge did not grant the Government's request that 20 million shares of Du Pont-con-

irelled GM stock be sold on the open market over the next 10 years. The Government had wanted the remaining 43 million of shares divided among Du Pont stockholders. La Buy's decision appeared
